

Periodic Puzzle

Puzzle of the Month

August 1, 2007

In this word find are twenty elements of the period table (listed below). The words do not necessarily form straight lines. However, for each word, the next letter may be horizontal, vertical, or diagonal from the last letter. Also, no two words intersect, and no word crosses its own path. The left over letters, if the words are found correctly, will form a question.

Be one of the first three people to submit the answer to the question, your name, and geographical location to info@pegamoosgames.com with the subject "Elementary, My Dear" for a chance to get your name on the Pegamoose Games Wall of Fame.
